Hand Lettering Font Vol. 5

As you are surely aware, graffiti is an artform that started with highly stylized writing on walls using spray paint and such, and here we are introducing a hand lettering font with a graffiti-like appearance. Volume 5 has a lively font stylized with arrows. Focus less on legibility and write in a way that embodies the fun and vigor of this lettering! You can enjoy using different types of pens, such as **Pentel Sign Pen** or **PAINT MARKER**.

How to Write Hand Lettering Font Vol. 5

1. The letters lean slightly to the left.

2. Incorporate an arrow into part of the letter. *When writing words, not every letter needs an arrow.

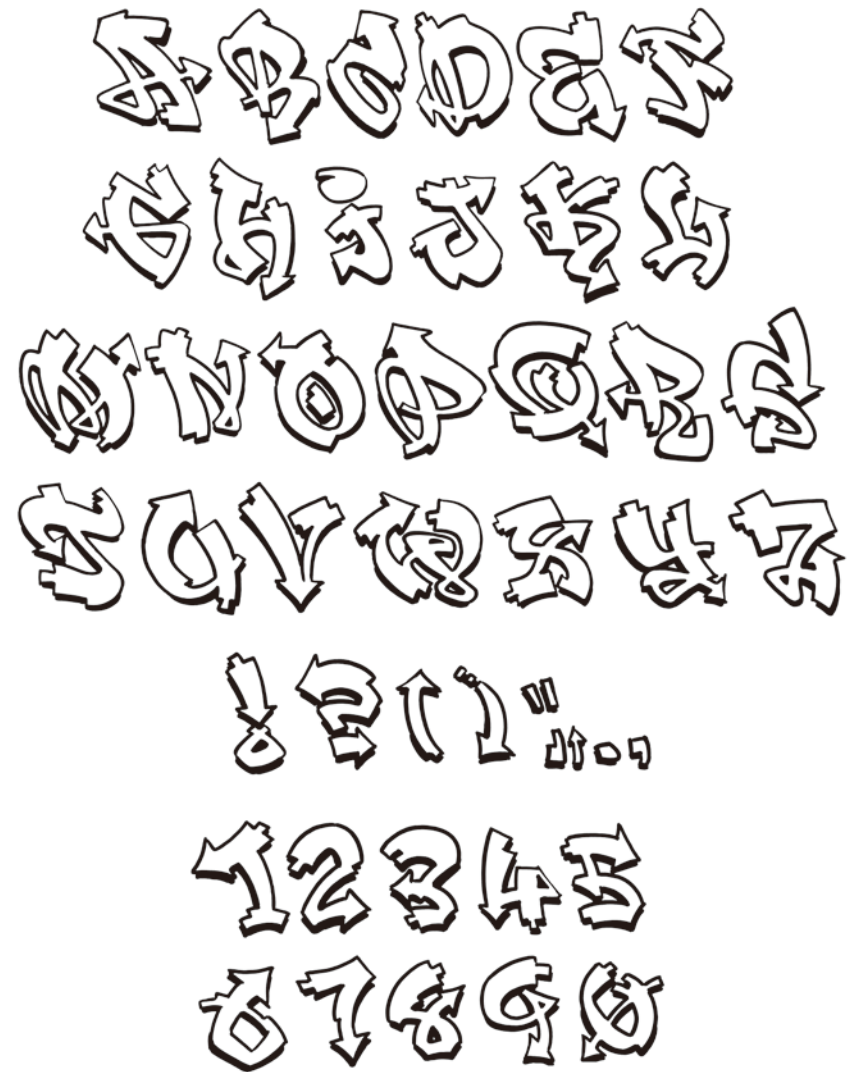

3. Add shadows to create a 3D look and more presence.

4. The graffiti-esque look in which you can't decipher what is written at first glance is what makes this lettering cool. A rhythmical, dancing appearance that looks more like a picture than a letter is ideal.
